Dear Shubham
As per the guidelines given by professor Anjani Kumar Verma, our data flow diagram needs some update as per the discussion. There are no relations between entities and the processes are also wrong. However, the level 3 diagram is correct but you need to update the level 1 and level 2 diagrams. Moreover, add some more necessary input fields in the blueprint as specified by the requirement analyst in the meeting.
Report back to me in 1 week.

Regards,
Ashutosh Jha

Dear Ashutosh Jha

Sure, I will update the data flow diagram as per the guidelines we discussed in the previous meeting and will coordinate with the requirement analyst to update the blueprint. Will get back to get you within a few days with the updated data.

Thank You
